Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, the applicant has reworded the language of the claims, but has not really addressed the problem regarding the ambiguity of the claims. Claim 1 still contains language that is alternative and , while the examiner is willing to give the applicant some latitude to make the claim broad in nature, the use of two alternative physical relationships between the elements within the same claim makes the claim simply too vague to examine. The examiner realizes that the applicant is trying to write a generic claim and then claim several embodiments within the dependent claims, but this must be achieved with an examinable generic claim. Finally, it should also be noted that if the applicant writes a proper generic claim and then claims different embodiments in the dependent claims, the claims will probably be subject to an election requirement in the next office action.

Since the problem with the claims may not have been clearly identified in the last office action, the examiner has made this action non-final.

Applicant's arguments filed 4/09/08 have been fully considered but they are not persuasive. In particular, while the applicant's changes to the specification are acceptable, his changes to the claims do not really address the problems under 35 USC 112.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carl S. Miller whose telephone number is 571-272-4849. The examiner can normally be reached on MTWTHF.
